

# IPv6 Technical SIG

1 March 2006  
11:00-12:30

# Agenda

---

- Around 40 attendance
- No action items
- 7 information presentations

## Status Reports

---

- IPv6 update
  - Arth Paulite, APNIC (15min)
  - Semiannual statistic report
  - The number of assignments registered in whois DB is increasing
- JPNIC IPv6 registry service update report
  - Toshiyuki Hosaka, JPNIC (15min)
  - Statistics in Japan
  - A bulk data exchange system for assignment data
- IPv6 deployment in Latin America and Caribbean
  - Jordi Palet, Consulintel (15min)
  - Inactive before June 2005
  - LACNIC held the IPv6 Tour; over 3,000 trained
- Introduction of "Softwires" WG in IETF
  - Jordi Palet, Consulintel (5min)

## Deprecation of ip6.int

---

- ip6.int deprecation project report
  - Sanjaya, APNIC (15min)
  - RIRs agreed to coordinate as a global activity
  - The cutoff date is 1 June 2006; not final but firm
  - Schedule (announcement, notify root ip6.int)
- Technical consideration on deprecation of ip6.int
  - Kazu Yamamoto, IIJ (15min)
  - The WIDE project expects no fatal thing will happen
  - Quality of reverse mapping would be better
  - If a server is running with "ip6.int only" resolver, side effects would happen. But rare and not fatal
- Progress report for ip6.int deprecation in Japan
  - Shin Yamasaki, JPNIC (15min)
  - Several announcements
  - Measurement of transition from ip6.int to ip6.arpa
