AfNOG

About AfNOG

- Each meeting consists of:
  - Hands-on workshop training
  - Technical sessions (AfNOG Tutorial and Meeting)

- Instructors and Secretariat on a fully volunteer basis constantly recruiting new volunteers.

- Annual AfNOG –AFRINIC Event re-branded as Africa Internet Summit (AIS) in May 2012 in Gambia.

- AfNOG 2013 was held under the AIS brand in Lusaka, Zambia in June, 2013.

AfNOG Localization Program

- A collaboration between ISOC, NSRC and AfNOG

- Project aimed at migrating the "AfNOG Track E0" Unix/Linux System Administration Course to be taught at country level.

- Instituted in 2008 and has been run in several African countries since and ongoing.

- Track E0 now SA-E is no longer taught at the main Annual AfNOG Event

The Standard Workshops

- Track SA-E: Unix System Administration

- Track SS-E: Scalable Internet Services

- Track SI-E: Scalable Network Infrastructure

Language Diversity introduced in 2002

- Track SI-F: Infrastructure Reseaux IP (Atelier SI-E en Français)

Workshop Tracks as at 2011

- Started at AfNOG 2011 Workshop in Dar Es Salaam, Tanzania in 29 May – 10 June 2011

  o Network Monitoring & Management

  o Advanced Routing Techniques

  o   Computer Emergency Response Team

Participants Background

- Internet Service Providers

- Telco Operators

- Government

- NGOs

- Educational & Research Institutions

Challenges

- Francofone Outreach
- Catering for language diversity
- Funding for workshops & meetings
- Logistics: People & Equipment
- Ensuring continuity
- Outreach

AfNOG-14 (AIS-1)

Af*

◆ Just like in APNIC .. Most if not all the Af* groupings have their beginings linked to AfNOG

○ AFRINIC

○ AFTLD

○ AFREN

○ AFRISPA

○ AfNOG CHIX

○ AfricaCERT

○ …..and a few more

AfNOG Chix Program

- Our Gender Program on Unix Systems Administration for female Network Engineers.

- Several female Network Engineers have been trained

- Event has so far been held in 4 countries
  - March 2007 – Nairobi, Kenya
  - Oct 2008 – Accra, Ghana
  - Oct 2009 - Gaborone Botswana
  - Oct 2010 - Nairobi, Kenya
  - Oct 2011 - Blantyre, Malawi

Achievements

✓ Trained over 4,000 Internet engineers
  - Many from Educational and research institutions and govt

✓ Former students are now instructors
  - Building new curriculum based on needs in the African region
  - New tracks progressively added to cater for training needs

✓ Created a meeting place for a number of other special internet interest groups to form and evolve.

✓ A positive legacy for the next generation of African internet Engineers to build on.
