

APNIC **36**
CONFERENCE

XI'AN, CHINA
20 - 30 August 2013

Local Community Engagement Update

George Kuo

george@apnic.net

Overview

- What is local community engagement?
- What activities are involved?
- Some observations
- Where have we been?
- Upcoming events

What is local community engagement?

- Extension of APNIC's external liaison and outreach
- Support of local Internet community events
- Continuing to build rapport and support for APNIC Members
- Promote APNIC's missions and services to the wider Internet community

What activities are involved?

- Speaking at local Internet events
- Holding APNIC training events or workshops
- Holding APNIC Members gathering
 - APNIC updates
- Providing Hostmaster consultations

Some observations

- Those who interact with APNIC regularly by emails or who are unable to attend APNIC Conferences are able to meet APNIC staff
- This allows APNIC Members and the wider Internet community to provide direct feedback on APNIC services for continual improvement
- Those who know very little of APNIC's missions and services are better informed
- Participants use the occasion to exchange information and share common issues they are facing
- This is also a great opportunity to discuss ideas face-to-face, or problems that are difficult to communicate by emails

Events in 2013

- Traceroute 2013 (The biggest Internet party) – Indonesia
- Member gathering and CTO Forum BD – Bangladesh
- IPv6 event by ASTI – Philippines
