Charter

The charter of the Database SIG is to examine developments in the operation of the APNIC Whois Database and to discuss related issues affecting registration practices, database security, specification of objects and database features.

Open action items

- **Action db-16-001:** Proposed "Policy for mirroring on IRR" (prop-003-v001), to be sent to the database mailing list for further discussion.
- **Update:** Modified proposal to presented later in the SIG.
- **Action db-16-002:** Secretariat to implement proposal "Privacy of customer assignment records" (prop-007-v001) in three months
- **Update:** Status report presented.
- **Action db-16-003:** Secretariat to implement proposal "Protecting resource records in APNIC Whois Database" (prop-010-v001). This will involve changing the maintainer of objects protected by MAINT-NULL to the maintainer of the parent object as well as deprecating NONE in the maintainer's auth attribute.
- **Update:** Status report presented.

A proposal to protect historical records in APNIC Whois Database Sanjaya, APNIC

- Protect all historical inetnum and aut-num with APNIC-HM maintainer
- Existing custodians can still use the resource, but will not be able to change the record
- Existing custodian who wants to maintain their records should sign a formal agreement with APNIC. Proposed annual fee is USD 100 per maintainer.
- **db-17-001**: Pending approval at each remaining stage of the policy proposal process, proposal to protect historical records with an APNIC maintainer (prop-018-v001) to be implemented by Secretariat.

A proposal of “IRR mirroring policy”

Junichi Matsumoto, JPNIC IRR planning team

- This proposal was a modified version of the proposal presented at APNIC 16.
- **db-17-002:** Proposal for IRR mirroring policy (prop-003-v002) to be returned to the mailing list for further discussion.

Private of customer assignments status report Sanjaya, APNIC

- This presentation summarised the APNIC Secretariat's activities to implement db-16-002 and db-16-003.

Early registration transfer project

George Michaelson, APNIC

- This presentation summarised the issues in managing the records for resources allocated before the RIR system was established.

Open action items

- **Action db-16-002:** Secretariat to implement the proposal to prevent customer records in the APNIC Whois Database being publicly available.
- **Update:** To be implemented by the third quarter 2004.
- **db-17-001:** Pending approval at each remaining stage of the policy proposal process, proposal to protect historical records with an APNIC maintainer (prop-018-v001) to be implemented by Secretariat.
- **db-17-002:** Proposal for IRR mirroring policy (prop-003-v002) to be returned to the mailing list for further discussion.
