

# [prop-040] Proposal for APNIC non-member annual service fee

Annual Member Meeting

8 Sep 2006

APNIC 22, Kaohsiung, Taiwan

Save Vocea

# Motivation

- Clearer service fee interpretations for future requests
- Reduce secretariat staff workload administering non-member accounts

# Definition

- Non-member account
  - Have allocation from APNIC but not wanting to join as member
  - Justify historical resource holding, sign statutory declaration and non-member agreement
- Historical resource
  - IPv4 space, ASN's originally obtained from registries such as InterNIC, AUNIC, etc.
  - Registration of these resources now transferred and managed by APNIC
  - Resource distributed by APNIC before agreement was in place (before 1997)

# Problem

- Inconsistent fees charged to non-member account holders
  - Increased staff time administering billing of 500+ accounts (and increasing!!)
  - Varied interpretations
- Fee collection
  - Insufficient penalties to deter defaulters
  - Time consuming process
  - Variable bank fees
  - No reward for early payers

# Existing framework

Service	Historical resource	APNIC resource
Account maintenance	\$100/yr	Free
ASN maintenance	\$100/yr/maintainer	\$50/ASN/yr
IPv4 address maintenance	Free with account maintenance	\$819.20+ /yr
DNS reverse delegation	\$50/zone file entry*	\$50/zone file entry*

\* Never applied

# Proposal: Introduce consistent fees

Service	Historical resource	APNIC resource	And..
Account maintenance	\$50	\$50	<ul style="list-style-type: none"><li>•Waived if settled via credit card</li><li>•MyAPNIC access to all accounts</li></ul>
ASN maintenance	\$50/ASN	No change	
IPv4 address maintenance (includes DNS reverse delegation)	\$50/Assignment	No change	<ul style="list-style-type: none"><li>•No new assignments or allocations of IP addresses to non-members (withdraw service)</li></ul>

## Proposal - cont'd

- Revoke and reclaim resources from defaulters (currently done for members)

## Effect on APNIC

- No direct effect to existing APNIC members

# Implementation

- As soon as practically possible after endorsement by the Executive Council
- Modify fee level specified in current ‘policy for historical Internet resources’

# Summary

- The secretariat seeks community support and endorsement to
  - Introduce this consistent fee structure incorporating account keeping and per-resource fees for all resources
  - Revoke and reclaim resources from defaulters who do not pay annual service fee

Thanks!
