

Proposal to remove requirement to document need for multiple /48s assigned to a single end site

APNIC Policy Proposal 044-v001

Jordi Palet, Consulintel

(jordi.palet@consulintel.es)

Summary

- Modification of section relative to the assignment of multiple /48s to a single end site

Problem Description

- Existing text suggest the reason for this is “lack of experience”
- It is not reasonable to ask the LIR to justify in a case by case basis
 - It should be a LIR decision
 - This already impacts on their own prefix utilization and will justify it when coming back for a new allocation
- This will also reduce unnecessary APNIC staff workload

Situation in other RIRs

- This proposal has already been submitted to the rest of the regions

Existing vs. Proposed IPv6 Policy

APNIC-089	Required
Document n x /48	Not Required
