How to access

The screenshot shows the APNIC ICONS Wiki homepage. The browser window title is "Home - ICONS Wiki - Mozilla Firefox". The address bar shows "http://icons.apnic.net/display/icons/Home". The page features a navigation bar with links: Home, IPv6, How-To Guides, Network Tools, Community, Photo gallery, and Glossary. A yellow arrow points to the "IPv6 Wiki" link in the "Community" section. The main content area includes a sidebar with links like Wiki Home, AS Numbers, IPv6, IPv6 Forum, Security, IGovernance, Peering, How-To Guides, Network Tools, and Community. The main text area contains the "IPv6 Wiki" heading, a welcome message, and a survey announcement: "Your feedback is very important! Take the IPv6 Wiki survey". The survey details state it opens on the 25th February and closes on the 26th February 2009.

ICONS Beta

What do you think of the wiki?
Please [contact us](#) with feedback or bug reports.

Why IPv6?

The free pool of IPv4 addresses will be exhausted in a few years - some estimate by 2011. At that time Regional Internet Registries will have no more IPv4 addresses to distribute to APNIC members. As a result, continuous growth of the Internet will be curtailed.

For example, businesses that depend on the Internet may find it difficult to expand their existing customer base. The free pool of IPv4 addresses can be extended through a number of methods such as developing ISP-NAT, however these methods will only delay the inevitable exhaustion of the free pool of IPv4 addresses.

Most Internet specialists agree that the only viable long-term solution is the deployment of IPv6 networks. APNIC supports pro-active information sharing among the Internet community to further develop the Internet. Sharing of information may be especially critical to the transition of IPv6 given the technical, regulatory, business and public policy challenges such transition presents.

This ICONS Wiki IPv6 page is for the community. Please register and feel free to share relevant information with others. Thank you.

ICONS IPv6 Wiki

Yes, this site is built in English, but don't let that stop you, even if you're not a native English speaker.

You can use online translation tools to give a rough translation into some languages.

For example: [Google Translate](#), [Yahoo Babel Fish](#), and so forth. Try it out!

This page is intended as a dynamic space where the Internet community can gather various IPv6-related information. The information and links in the APNIC ICONS Wiki IPv6 will be constantly updated.

If you find missing information or want to contribute content, please let us know! You can email [<ipv6@apnic.net>](mailto:ipv6@apnic.net), 'Add Comment', or create a thread through the 'Forum' page.

Tell us what you think

Your feedback is very important!

[Take the IPv6 Wiki survey](#)

Help us improve the icons IPv6 Wiki by completing our survey. You will be in the draw to win two fantastic lucky draw prizes. **The winners will be announced during the APNIC Member Meeting on Friday, 27 February 2009.**

The survey opens on the 25th February and closes at 17:00 (UTC+8 (Manila time)) on Thursday, 26 February 2009.

[Take the survey and enter the prize draw](#)

Annotations on the screenshot include a yellow box around the URL in the address bar, a yellow arrow pointing from the "Your feedback is very important!" text to the "Take the IPv6 Wiki survey" link, and a purple oval around the "Your feedback is very important!" text.

Please participate in the survey

- IPv6 Program Wiki survey
 - Link to the survey
 - https://www.surveymonkey.com/s.aspx?sm=p534DuW8pGK9OYA5mBhtFA_3d_3d
 - The survey closes at
 - 17:00 (Manila time) on Thursday, 26 February 2009
 - Two fantastic prizes
 - Winners will be announced on Friday morning, 27 February 2009.

Thank you
and
see you on IPv6 Program Wiki!
