

Services Area Report

Sanjaya
Services Area Director

Key Deliverables

- Delivering Value
 - Resource Quality Assurance
 - MyAPNIC enhancements
 - DNSSEC
 - Kickstart IPv6
 - Extension of Helpdesk hours
- Supporting Internet Development
 - Abuse contact policy implementation
 - TTM and Root Server deployment
- APNIC Service Level Stats

Delivering Value

- Resource Quality Assurance - APNIC acts to minimize any routability problems through communication, training, and testing
 - Reachability testing and experimentation conducted in collaboration with RIPE NCC with support from several organizations
 - Promotion of responsible filtering and security practices
 - www.apnic.net/rqa

Delivering Value

- Streamlining APNIC digital certificate requests
- Upcoming MyAPNIC enhancements
 - Resource Transfer Policy implementation featured on MyAPNIC
 - Whois update feature improvements
 - DNSSEC ds-record submissions
 - Secondary reverse DNS service

Delivering Value

- DNSSEC Phase 3
 - Secure methods for Members to supply DS records, linking the name servers we publish in our zones with the keys Members use in their zones
 - MyAPNIC users will be able to easily update their Reverse DNS with their DS resource record.

Home / Resource management / Reverse DNS

Add reverse DNS delegation

Important: Please make sure that your name servers are up and running and are authoritative for the zone.

Address range:

Use CIDR address prefix notation. Multiple range allowed, one range per line.

Example:

202.12.28.0/22
202.120.0.0/20

Name servers:

List fully qualified domain names of at least 2 servers.

Important: Do not list IP addresses or reverse DNS names.

Example:

ns1.example.com
ns2.example.com

DS Resource Record: ?

Optional.

You can enter several DS records at a time by typing each on a separate line.

Example:

28.12.202.in-addr.arpa. 60485 5 1 49403495025F22588179A53B0A98631FAD1A292118

Maintainer:

Optional.

If no maintainer is specified, the maintainer of the parent inetnum will be used.

Example:

MAINT-JU-EXAMPLE

Next

Delivering Value

- Kickstart IPv6
 - 403 applications so far since Feb 2010
 - 35 economies participating, including 12 new economies

Delivering Value

- Kickstart IPv6
 - Streamlining membership applications for IPv6
 - One-click IPv6 membership sign up
 - Resources obtained easily and immediately

Delivering Value

- Extended Helpdesk hours
 - 12 hours of operation
 - 09:00-21:00 (UTC+10)
 - 21:00 (UTC+10, Brisbane) = 16:00 (UTC+5, Lahore)

*APNIC Helpdesk Hours Extended.
Now Open through to 21:00 (UTC+10 Hours).*

Supporting Internet Development

- Abuse contact policy implementation
 - To be implemented in November
 - From November 8, all IP address and AS number record in whois must include a mandatory reference to an IRT object
 - From 2011 the trouble and abuse-mailbox fields will begin to be removed from all other whois object types
 - MyAPNIC feature improvements will allow updating of these objects through MyAPNIC

Supporting Internet Development

- TTM and Root Server deployment
 - APNIC has funded 12 Test Traffic Measurement (TTM) nodes across the region
 - 2010 installations in New Zealand, Nepal, and Cambodia, Bangladesh
 - Installed F-root server in Cambodia which went operational at the end of July
 - Coming up: Bhutan, Mongolia, Pakistan

APNIC Service Levels

- Membership growth
 - Increased to 3,132 account holders as of August 2010
- Helpdesk enquiries
 - Growth of over 12% in the last year
- Delegations in 2010 (up to 16 August)
 - IPv4 – 772
 - IPv6 – 420
 - ASNs – 464

Thank You!
