Self-published Geofeeds; the role of RIRs

Valuable, trusted common ground for IP owners

1 **Already used for IP ownership**

Well established workflows for all operators

2 **Establish “Chain of Trust”**

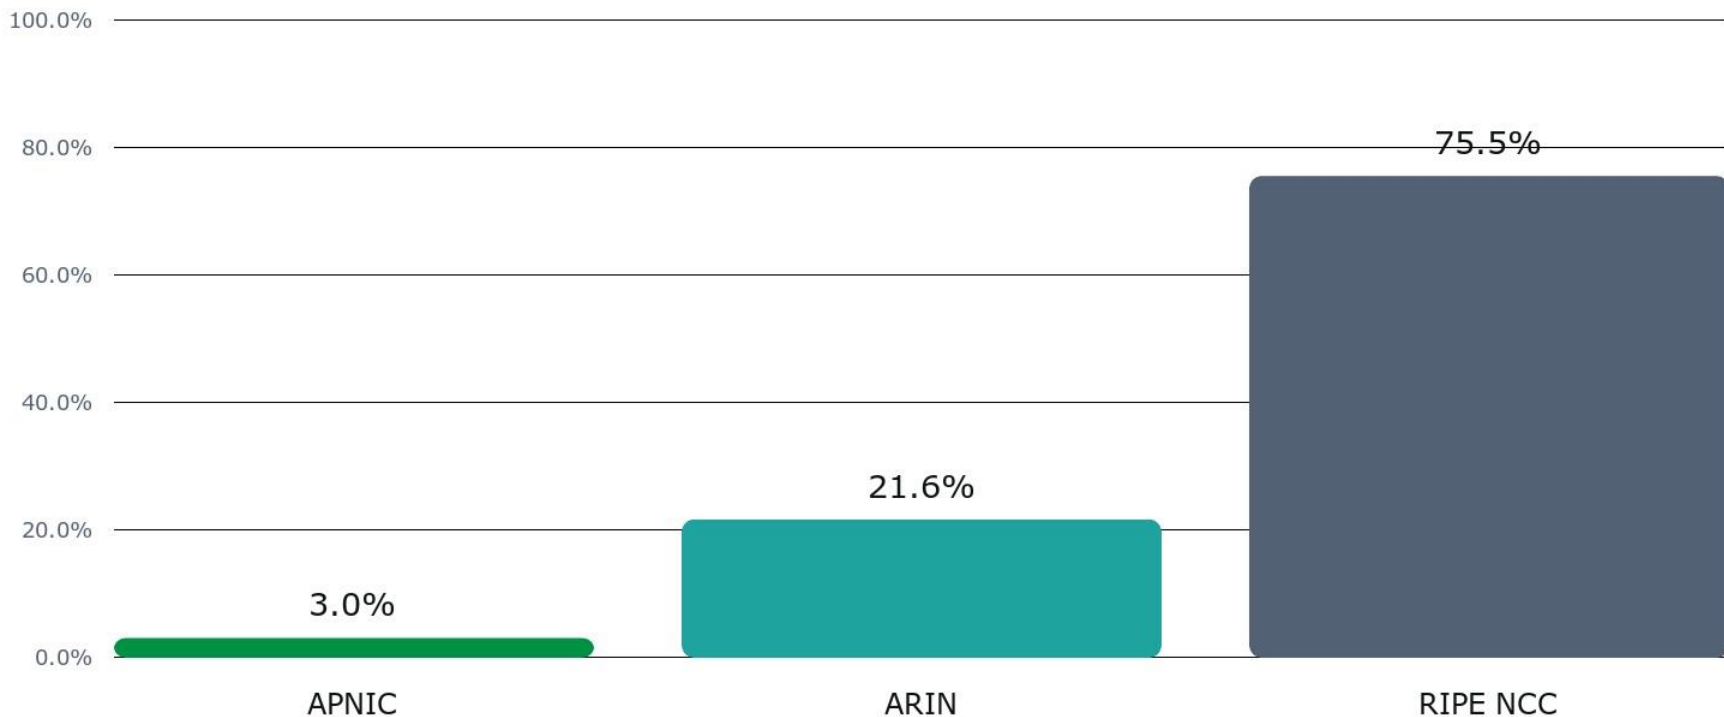

Easy to **verify authenticity** (RFC 9632)

3 **Highest-leverage point of change**

Fastest way to **drive awareness and adoption**

Successful Geofeed publishers - which RIR are they from?

By Network IDs (distinct netnames).

Dataset = 200K WHOIS-discoverable randomized set of geolocation rows from geolocatemuch.com. AFRINIC and LACNIC are intentionally omitted due to technical reasons.

One Ask, for the RIRs in this room

RFC 9877 already exists — co-authored by APNIC + ARIN, published Oct 2025. Let's use it.

Registries: please make
publishing of IP geofeed URLs
“one-click” in your dashboard !

*An informal APNIC WhatsApp community poll ranked “**unsure how registry can help**” as the #2 barrier*

Registries: please make it publishing easy!
